

Child & Youth

Development-oriented
support & treatment

 **Lunet** ZORG

Support and treatment for children from the age of 0 years and youngsters with a development disorder.

We offer various support services and treatments

Does your child have a development disorder and ADHD, autism or a learning disability? It is important to stimulate a child at the earliest age possible in their development. This stimulates the child to grow optimally within their own possibilities. Developing talents and seeing and seize opportunities are very important. The team of Child & Youth supports and treats children from the age of 0 years and adolescents.

KinderExpertiseCentrum Brabant

Are you worried about your child?

My child is not talking, my child is too busy, my child is not yet walking, I don't get in touch with my child. Or sometimes there are unclear problems. We can help when you worry about the development, education or behavior of your child (from the age of 0 years). The process consists of testing and a tailor made advice. You quickly know if something is wrong and what is going on.

KinderDienstenCentrum

Development-oriented treatment

You raise your child and receive help and advice from family and friends. But sometimes you are faced with questions where you need professional help.

We offer a school preparation and a school replacement treatment program for children from the age of 0 years. Our professional staff provides a pleasant environment where children are encouraged in their development and education. We are experts in multiple specialist areas such as learning disabilities, ADHD and autism.

Our locations are situated in Eindhoven, Eersel and Maarheeze.

Group composition & treatment

The groups consist of 8-10 children. Under the supervision of a remedial educationalist all children get personal attention for their individual development. Every group is intensively supported and treated by a solid team of 3 supervisors. Every child gets a personal supervisor who is also your contact person. We like to involve parents, care takers, family and other volunteers in our programs.

Our multidisciplinary team takes care of your child to learn and grow whilst having fun. This happens in a physical and emotional safe environment. The remedial educationalist keeps a close eye on the development of each child.

We treat your child in collaboration with:

- A remedial educationalist
- A speech therapist
- A physical therapist
- A game coach
- A communication trainer

Development goals & areas

The possibilities of every child are a primary consideration.

The development areas differ per child. These can be:

- Cognitive (the ability to acquire and process knowledge),
- Socio-emotional
- Behavioral
- Language and speech oriented
- Sensory
- Motorial

SoVa training

Improve social skills and self-reliance

We offer general and social skill training for children (SoVa training). This training is specially for children who still lack certain skills for the primary school or special education. We monitor the children individually or in a small group. The goal of SoVa training is to improve social skills and stimulate self-reliance.

Living

A safe and pleasant place to live for young people

If for some reason living at home is not possible or if a more independent place is preferred, Lunet zorg offers a safe and pleasant living environment for youth. Together we seek the most suitable form of living. This can be in a sheltered area or supervised living.

We also have family homes where young people (from 0 to 23 years old) live with existing families. In an ordinary house, in an ordinary street, where two parents, with a professional background, live. This is possible for a short or longer period.

Accommodation to stay and supervision

A few hours, weekend or longer

Sometimes it is nice or necessary that someone else temporarily takes care of your child. This can be for a few hours to a weekend or longer. At different locations in Eindhoven and surrounding area we offer temporary childcare in the form of out-of-school supervision and accommodation. The professional supervisors stimulate development and social skills. They also organize activities to have a nice and educational time.

Care at home or at school

Extra helping hand

Occasionally parents or children who attend school or children living at home need an extra helping hand. Especially for these parents and children we have an ambulatory team, consisting of HBO skilled youth care workers. The ambulatory employee supports at questions about care and education. They come both at school and at home. In close cooperation with the remedial educationalist /psychologist they give pedagogical and practical advice.

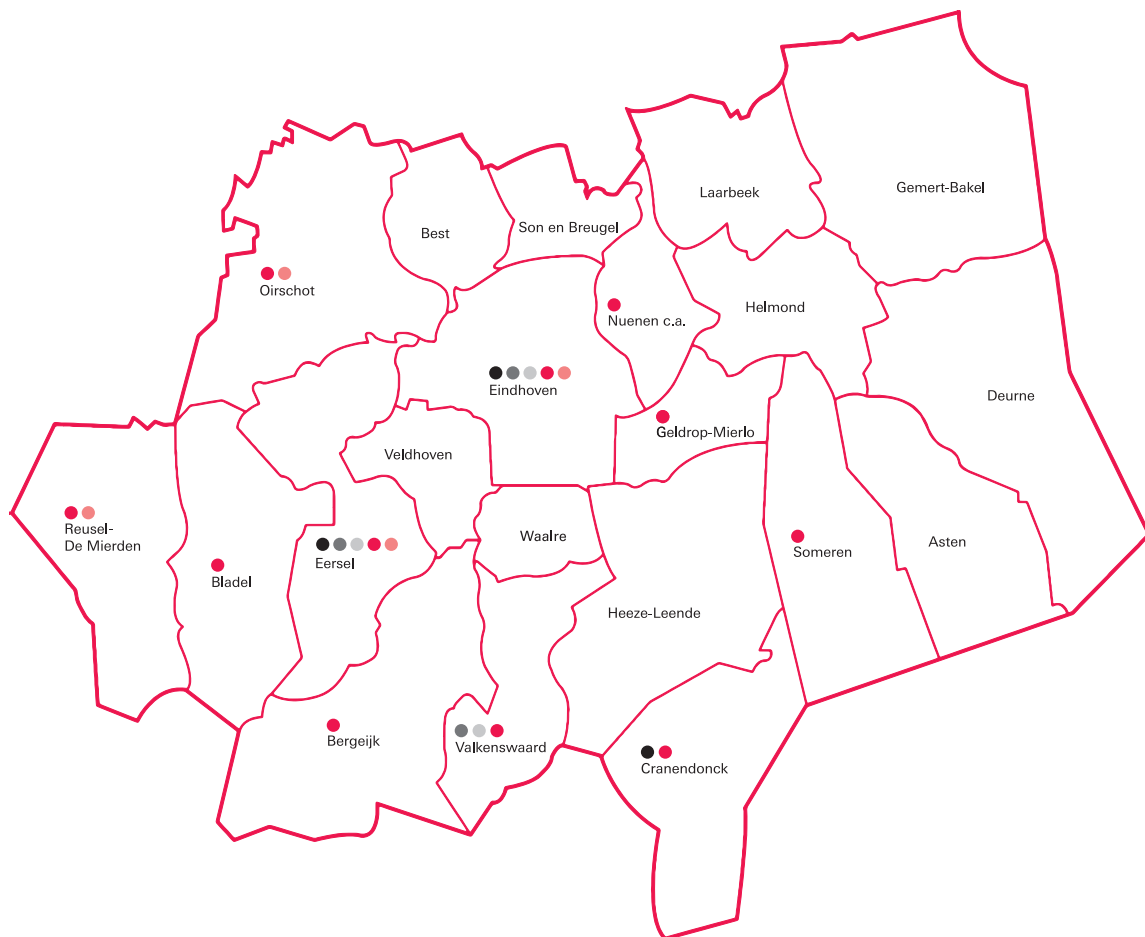

Lunet zorg

The Lunet zorg foundation supports people who are mentally disabled. With a team of 2,650 professionals and 1,100 volunteers we take care of over 2,700 clients. Our clients are of all ages and count on us for living and working, day activities and leisure time activities. We provide care from a few hours a month to 24 hours a day intensive care. At around 100 locations or in their own home.

Sign Up

Together with the care intermediaries of the Client Office it is determined which support is most suitable. They also help with applying for the indication, financing and administrative processing. Telephone: 088 551 6000
